Ideation Phase
Empathize & Discover

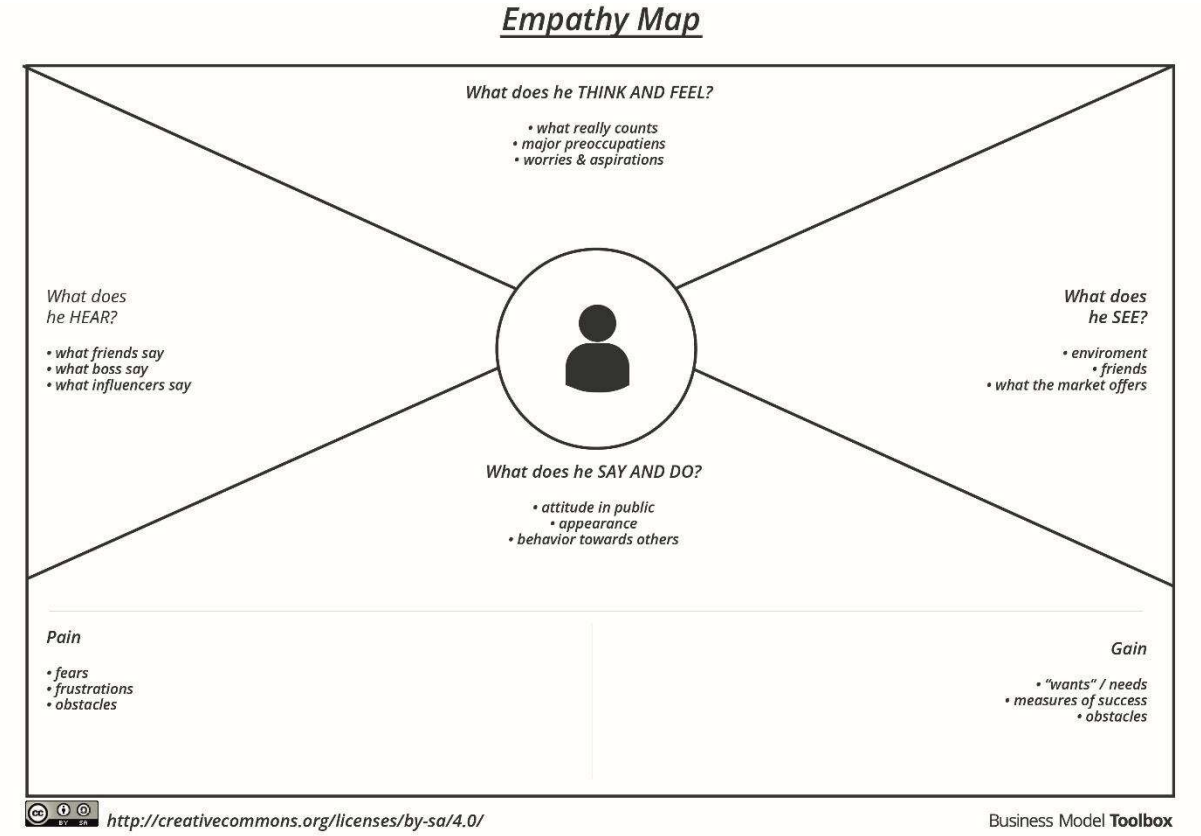
Date	9 March 2026
Team ID	
Project Name	Heart Disease analysis using tableau
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:



USER: Doctor / Healthcare Analyst

THINK & FEEL

Needs quick insights from patient data to detect heart disease risks early. Concerned about missing important patterns in large datasets.

SEE

Large amounts of patient records, medical reports, and health indicators such as cholesterol, blood pressure, and age.

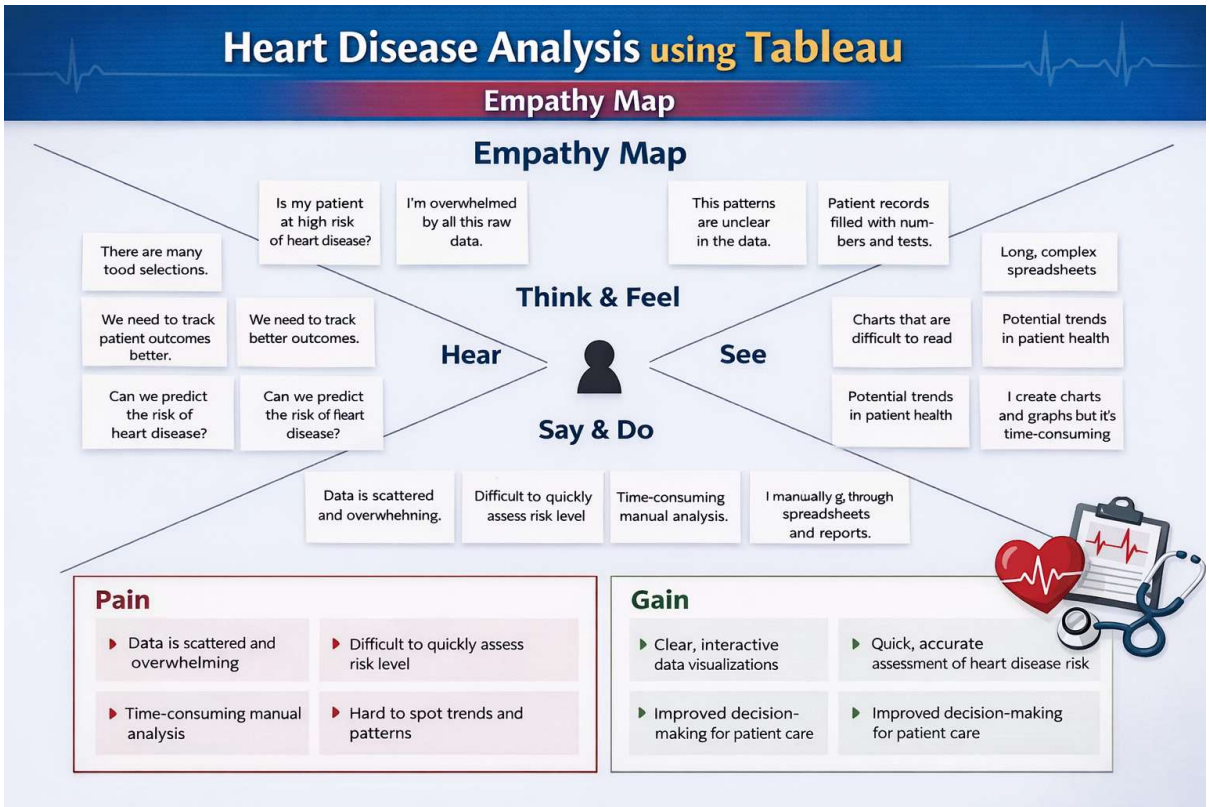
HEAR

Advice from medical professionals, research papers, and hospital management about improving diagnosis accuracy.

PAIN

Manual analysis of health data is time- consuming and complex. Difficult to visualize patterns quickly.

GAIN

Interactive dashboards that clearly show patterns and risk factors, helping doctors make faster and better decisions.


Heart Disease Analysis Empathy Map.
