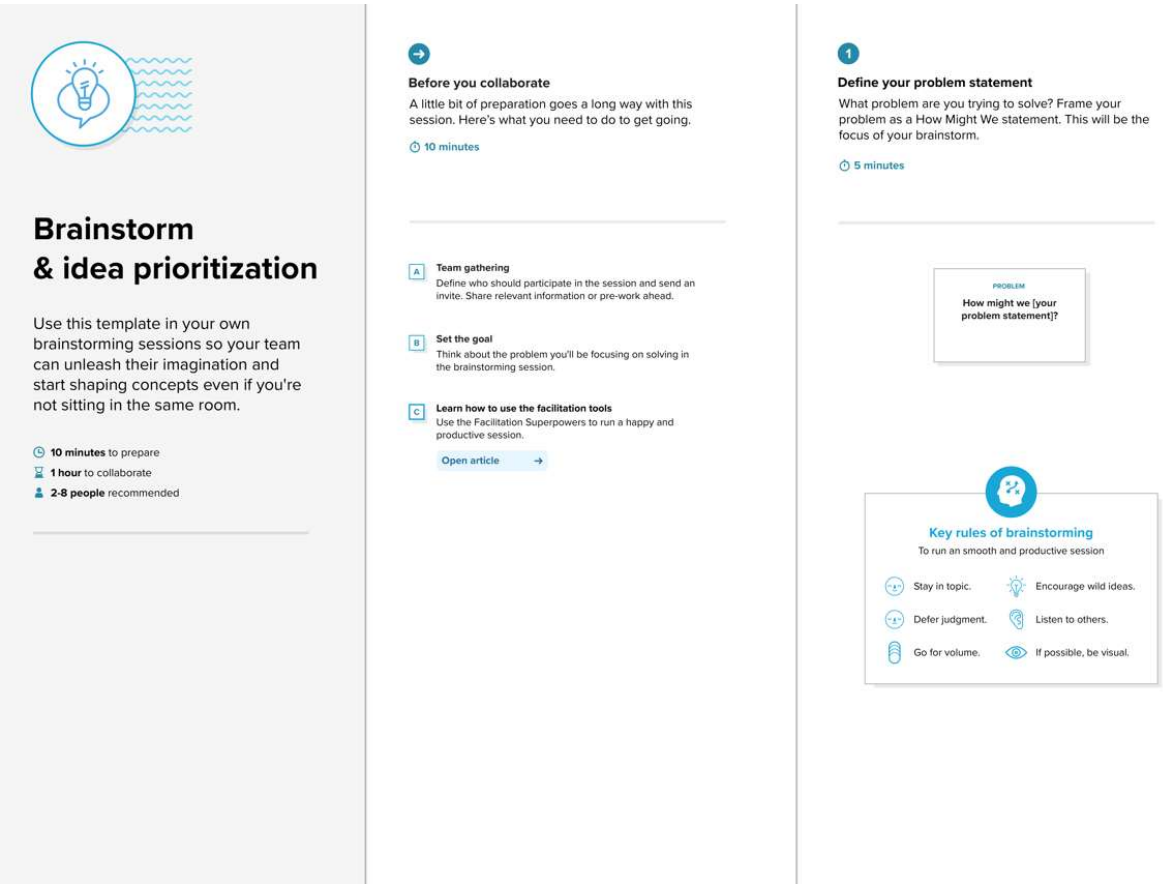
Ideation Phase
Brainstorm & Idea Prioritization Template

Date	9 March 2026
Team ID	
Project Name	Heart Disease Analysis using Tableau
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Healthcare datasets contain large amounts of patient information but it is difficult for doctors and analysts to quickly interpret patterns. Our team decided to analyze heart disease data and build an interactive Tableau dashboard that helps identify risk factors such as age, cholesterol, blood pressure, and chest pain type.

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping

Create Tableau dashboard for heart disease dataset

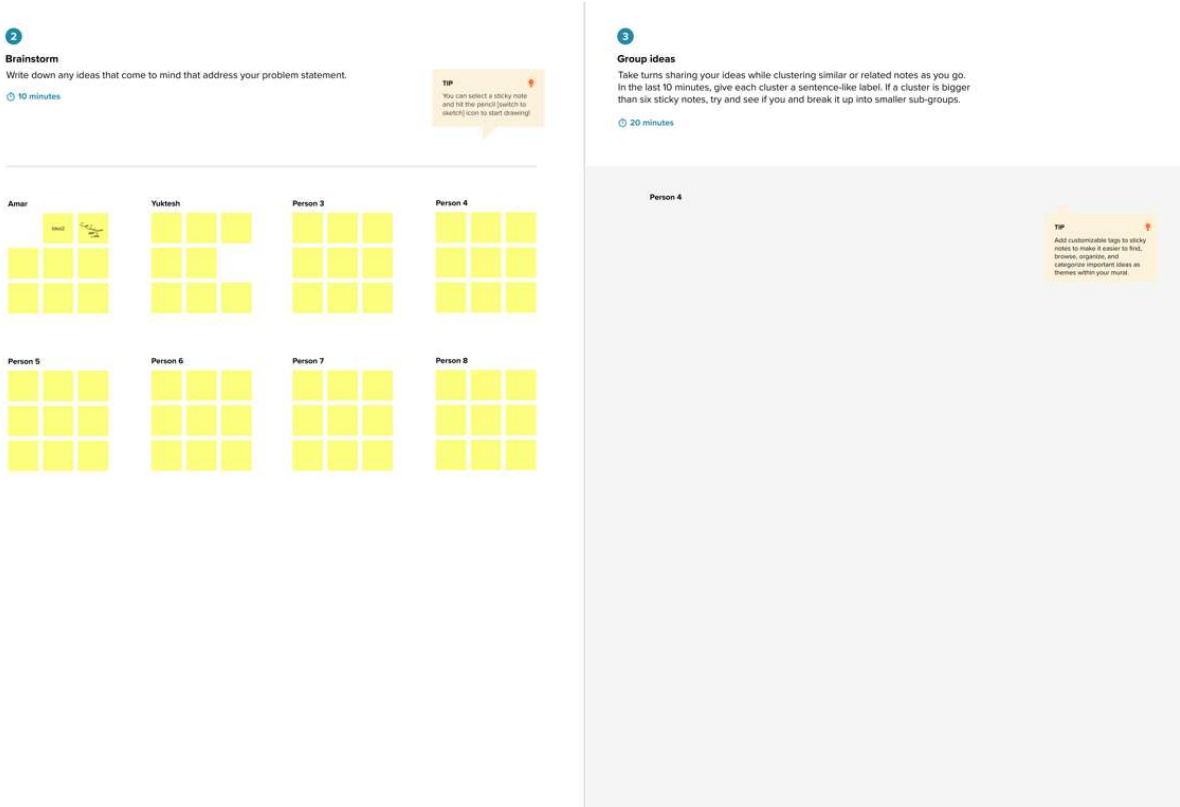
Visualize patient age vs heart disease risk

Analyze cholesterol and blood pressure patterns

Identify most influential risk factors

Provide hospital- level insights for doctors

Interactive filters for gender, age group, and chest pain type



Step-3: Idea Prioritization

Final Idea: Build an interactive Tableau dashboard that analyzes heart disease data and helps doctors and analysts understand key risk factors and patterns for early diagnosis.

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
